

Soodi baspar^{tak}

Manufacturer of containers **IML**

Benefits and profit differences:

Molding unit:

One of the characteristics of Soodi Baspar company is the formation of a design and mold making and mold maintenance unit with up-to-date machines and tools and experienced technical technicians. It is worth mentioning that all the technical and engineering issues required are done internally and completely scientifically in the best possible way. This has greatly reduced the time of mold repairs and helps the stability of production and supply. It is worth mentioning that in order to maintain the excellent quality of the products and the production of high-quality materials, this company is cooperating with the best manufacturers of the **IML** label, and also the use of the best raw materials and machines in the world has also improved the quality of the products produced by this company.

Design unit:

As you know, the advantage of **IML** production is the better quality of printing and advertising. By establishing a design unit, this company will examine all the demands and problems of customers in this regard and provide the best solution for them.

Engineering Unit :

Another feature of Sodi Baspar company is the possibility of labeling based on the designs and requests of customers with different shapes and designs. As you know, for this, it is necessary to design and build different and complex parts of the robot, so that all the steps inside the Sodi Baspar company are operational in the shortest possible time.

Sales and export:

Also, by providing good services in the last 2 decades, this company has been able to attract many large and small companies in various fields such as: dairy products, sesame products, dates, sweets and chocolates, etc. In addition, relying on the technical ability and awareness of the country's packaging industry's needs and providing suitable solutions for it, it has put export to most of the countries in the region on its agenda for a long time.

History of Sodi Baspar Tech Company:

Since 2005, under the name of Soodi Trading, along with the expansion of the culture of consuming **IML** containers in Iran, Sodi Baspar has been importing containers in various fields of food industry, especially dairy, and in line with organizational planning, in 1389, with the launch of Sodi Baspar Company. With the aim of producing domestic products, he purchased complete machinery and equipment for the production line of **IML** containers. With the help of Almighty God, this collection has been growing since the beginning and has always added to the number of its production lines. It should be noted that at the end of 1401, the number of production lines is more than 40 lines with 33 different formats in different shapes and sizes, which has been expanded based on the needs of the domestic market as well as export markets. Based on the existing machines and molds, the monthly production capacity of 25 million pieces of **IML** containers has been implemented and according to the plans made by the end of 1402, this number will increase to 33 million containers.
